## DETAILED ACTION

1. This action is in response to the application filed March 2, 2004.
2. Claims 1-5, 9-17, 21-30 are pending in the application. Claims 1, 9, 21, and 26, are independent claims.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. **Claims 1-5, 9-17, 21-30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,789,229.**

**Although the conflicting claims are not identical, they are not patentably distinct from each other.**

**In reference to independent claims 1, 9, 21, and 26, Dunietz 229':**

Receiving an indication of a selected portion of a document that is suitable for display via a computer based device (compare to "*receiving an indication of a selected portion of the document*"). See Dunietz 229', claim 1.

Determining a hard break in the document immediately prior to the selected portion (compare to "*determining a hard break in the document immediately prior to the selected portion*"). See Dunietz 229', claim 1.

Determining a reproducible page corresponding to the selected portion based upon the hard break (compare to "*determining a reproducible page corresponding to the selected portion based upon the hard break*"). See Dunietz 229', claim 1.

Calculating a page number by adding the number of pages to the sum of page counts, calculating a number of pages inclusively between the reproducible page and the hard break, and calculating a sum of page counts between a plurality of hard breaks prior to and including the hard break (compare to "*calculating a page number corresponding to the selected portion by adding a number of pages inclusively between the reproducible page and the hard break to a sum of page counts between a plurality of hard breaks prior to and including the hard break*").

See Dunietz 229', claim 1.

The reference fails to explicitly state a method claim for performing the following steps; however, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have associate the computer-executable instructions as claimed in Dunietz 229', to perform the proficient display of hard breaks and page number calculations.
